DUSHYANTH RAMALINGAM

OmniFDE Consultant | Practice Head – AI & Hyperautomation |
Agentic AI Systems | Gen AI Engineer | Founder @AiSensei
WP. Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Summary

I build AI and automation systems that do more than just automate tasks — they help businesses move faster, make better decisions, and scale operations. With a background in solution architecture, hyperautomation, and AI engineering, I work across RPA, GenAI, enterprise automation strategy, and product thinking to turn ideas into usable solutions. Today, my focus is on:

- Agentic AI systems
- RPA + GenAI transformation
- Enterprise automation strategy
- AI product design and experimentation
- Building scalable real-world solutions

I'm also passionate about building dream products, exploring new AI capabilities, and sharing practical insights on how humans can evolve with AI rather than fear it. Open to connecting with people working in AI, RPA, automation, product innovation, and agentic systems.

Experience

Symprio

6 years 6 months

Capability Lead — AI & OmniFDE

November 2023 - Present (2 years 8 months)

Malaysia

- Lead the Automation Practice, directing global strategy and delivery for 20+ clients across Asia, the Middle East, and the US.
- Manage a 6+ member team, overseeing the full project lifecycle for both advanced RPA and custom AI development projects (including local RAG systems).
- Personally drive solution design, MVP creation, consulting, and training for all major automation initiatives.
- Partner with senior business and IT stakeholders to align automation initiatives with digital

transformation goals.

Automation Solution Architect

January 2020 - November 2023 (3 years 11 months)

Malaysia

- Architected and delivered enterprise-scale automation solutions, helping to build and scale the company's Automation Centre of Excellence (CoE).
- Established and refined governance, operating models, and delivery frameworks for sustainable, large-scale automation.
- Partnered with senior business and IT stakeholders to align automation initiatives with digital transformation goals and ensure scalable deployments.

Generali Malaysia

RPA Project manager

June 2024 - June 2025 (1 year 1 month)

Malaysia

Led key RPA projects within the insurance domain, improving process efficiency and team alignment.

Spearheaded multiple RPA initiatives, leveraging prior development and architecture experience to deliver improved outcomes.

Worked cross-functionally with operations, IT and change-management teams to streamline key business processes and enhance automation throughput.

Fostered team cohesion and elevated automation maturity by mentoring developers and business stakeholders on best-practices.

KGiSL GSS

RPA Engineer

June 2017 - December 2019 (2 years 7 months)

Coimbatore Area, India

- Joined in India, mastered UiPath, and relocated to the client site in Malaysia within two weeks; remained based in Malaysia, building strong client trust by demonstrating development and solutioning skills, which was key to retaining and growing the account.

- Functioned in a hybrid Business Analyst, Solution Architect, and Developer role to personally deliver and oversee 100+ automated processes.
- Architected and implemented a scalable, foundational RPA framework for a key insurance client, which is still in use today.
- Transitioned to a Pre-sales Engineer, supporting the sales team by meeting clients across diverse domains (BFSI, logistics, aviation) and helping to win new deals.
- Acted as the lead technical expert for all critical clients, ensuring high satisfaction and zero escalations.
- Conducted formal UiPath developer training for a major aviation company, receiving excellent feedback.

KGISL IAS

Javascript Developer

2017 - 2017 (less than a year)

Coimbatore, Tamil Nadu, India

- Owned the entire end-to-end product development lifecycle for a new Queue Management System (QMS), built from scratch in 3 months.
- Acted as the sole BA, Solution Designer, Developer, and Tester, successfully gathering requirements and delivering the full solution.
- Integrated a custom Slack bot with the QMS to provide automated answers; this system also served as a final year project for a Master's degree (MCA).
- Managed all deployment (DevOps), maintenance, and end-user training for the system's rollout across various departments.

Caliber Interconnect Solutions Pvt Ltd

Linux Administrator

January 2012 - 2016 (4 years)

Coimbatore, Tamil Nadu, India

- Managed the complete IT infrastructure for a 250-employee organization.
- Deployed, configured, and maintained all in-house core services, including Mail, FTP, and Chat

servers.

- Implemented and managed the organization-wide firewall to secure the network perimeter.
- Developed custom shell scripts for server monitoring, protection, and automated alarming systems to ensure high availability.

Nations Trust Bank PLC

outsource trainee

December 2011 - February 2012 (3 months)

Once I completed my school, I joined NTB as an outsourced employee. I was assigned to handle cheque book-related operations like

- Printing cheque books based upon the requests.
- Dispatch the printed cheque books to relevant branches.
- Key in the necessary information to the system to approve the cheque books.
- Handling the cheque books requests from various branches.

KFC

part time employee

August 2011 - November 2011 (4 months)

colombo, srilanka
